Quantum
Measure a nanodevice at millikelvin in a tilted magnetic field 0 14 12
Check that the wiring for a superconducting qubit chip does not overheat the coldest stage 0 14 12
Characterise a superconducting qubit chip 0 14 12
Materials
Measure electrical resistance at low temperature 0 12 14
Measure how a sample responds to a magnetic field (VSM, 9 T) 2 11 13
Measure how a sample responds to a magnetic field (magnetoresistance, 10 T) 0 11 15
Chemistry
Study a sample using light at low temperature 4 19 3
Observe a sample changing as its temperature changes (polarized microscopy) 4 10 12
Observe a sample changing as its temperature changes (photoluminescence) 0 14 12
Biology
Examine a sample under the microscope while keeping it cold 8 15 3
Cut a frozen tissue sample 2 23 1
LD250 (manual v2.0)
LD400sl + HD wiring
LD450 (2026 spec.)
